Interest Rates,

applied by First Investment Bank

on bank accounts in local and foreign currency

Interests on accounts

Under the Law on Bank Deposit Guarantee the Bank Deposit Insurance Fund-Bulgaria shall guarantee payment in full of the balances held with First Investment Bank by any person (individual or corporate customer) on deposits in Bulgarian lev terms and in foreign currency terms and any interest accrued thereon, for any amount not exceeding BGN 196,000.

Interests on credit products

The interest rates accrued on borrowings (including current accounts, time-deposits and saving accounts) are accumulated according to the interest rates policy of the Bank and the conditions on local and foreign markets, and they come into force after decision of the Managing board of FIB. The Bank announces the utmost interest rates for each type of bank account or currency and reserves its right to change the applicable interest rates unilaterally. Current interest rates are announced preliminary in the bank's offices and are published on the website of Fibank: www.fibank.bg / Bulletin of Interest rates.

Appendix

Methods of interest calculation

Annual nominal interest rate (simple interest) - the accrued interest is not added on the principal after expiry of the deposit maturity; the accrued interest has to be transferred to other customer account or paid to the customer in cash.

Interest rates are calculated on annual base, regardless of the deposit maturity. For example: If a 3 months time - deposit is opened at 4% annual interest rate, after expiry of its maturity date it would be accrued an interest equal to 1% of the principal of the deposit. In case of renewal of the deposit, the interest rate for the two terms would be 2%, for 3 periods – 3%, for 4 periods (per year) – 4%.

Annual effective interest rate (compound interest) – the accrued interest is added to the principal of the deposit after expiry of the maturity date; if the deposit renews then its principal would be increased with the amount of the paid interest for the new term.

Regarding the example stated above, if the customer does not terminate his 3-months time-deposit and for the next 3 terms the accrued interests are added to the principal of the deposit, then the annual effective interest rate accrued on the original amount of the deposit, would be 4.0600%.
